

The Journey

Libra Edge offers a thoughtfully designed hydrothermal experience, tapping into the guests emotions by bringing back the memories of standing in the summer rain or sitting underneath the gentle massage of a waterfall.

The experience involves a therapist using strategically placed showerheads to direct streams of warm water over the guest's body while they lie on the table. It is often combined with other treatments, such as massage, and using specific products like body wraps, exfoliating treatments, or a moisturizing facial.

The combination of water pressure and massage techniques can help stimulate blood circulation and lymphatic flow, relax muscles and alleviate minor aches and promote a sense of overall relaxation and well-being.

Further benefits include:

- Fighting off fatigue, stress, anxiety and depression states
- Enhance skin health through hydration and exfoliation
- Supports detoxification and immunity

Steam sauna

An attachable cover and integrated steam nozzles efficiently transform the Libra Edge into a steam sauna.

Face shield

Protects the face from any unwanted contact with water.

Aroma capsules

With the optional system nestled at the hand shower outlet, in an instant, the water wraps the guest in a cocoon of soothing scents.

Music and sound system

For a completely immersive experience, you can opt for the Kohler® sound system's waterproof speakers, seamlessly integrated into the shower arm.

**Retreat into tranquillity with a luxurious
choreographed shower experience**

Support immunity with a sensory embrace

Nourish the nervous system and enhance circulation

Cleanse, calm and balance Body, Mind & Soul

“It’s... OMG a gamechanger!”
Samuel, Hot Springs Owner

Kneipp Therapy

Kneipp Therapy is a form of natural medicine developed by Sebastian Kneipp, a 19th-century German priest. It revolves around the use of water for therapeutic purposes, specifically through various methods such as hot and cold baths, showers, and compresses.

Kneipp Therapy alternates between different water temperatures and dynamic pressures, finding its modern embodiment in the Libra Edge. Harnessing the essence of water's therapeutic properties, the Libra Edge offers a transformative experience that intertwines the age-old wisdom of Kneipp's hydrotherapy with advanced technology.

Specifications

TECHNICAL SPECIFICATIONS:

Height of lying surface: 63-100 cm (24.8-39.4 in)

Height incl. arm: 190 cm (74.8 in)

Length of laying surface: 203 cm (79.9 in)

Length incl. arm: 236 cm (92.2 in)

Width: 85 cm (33.5 in)

Lifting capacity: 300 kg (661.4 lbs)

Capacity of lying surface: 350 kg (771.6 lbs)

Total weight of bed: 250 kg (551,2 lbs) +/- 50 kg (110,2 lbs) depending on options

FEATURES:

6 zone horizontal shower arm with Kohler® water technology

Lying surface with air cushioning technology

Base made of Corian®

Shower arm cover in aluminium

Intuitive touch screen control panel

Electrically adjustable and tiltable lying surface

Facial water shield

Hand shower

Integrated water drainage system

International voltages available
